# The E930 Rescue Patrol Boat

The E930 Rescue Patrol Boat is built with utility in mind. Fully constructed from HDPE, this vessel is unsinkable, virtually indestructible, and requires minimal maintenance.

With a payload capacity of 3,240 lbs and twin outboards up to 400 HP, the E30 is ready to perform in tough marine conditions where reliability matters most.

# Fast Facts

The E930 Rescue Patrol Boat

**Capacity**  
3240lbs. (MPC)

**Team**  
Up to 10 People

**Size**  
Length: 31'-2" LOA

**Range**  
200 nautical mile

The king of the waters, the 30ft ember, was created to provide a bird's-eye view of the water for any job requiring good visibility. Designed with a hull constructed of sheet HDPE CNC precisely to fit together without rivets or bolts that corrode and fail. Our hull design allows for easy modification and customization, clean and precise quality control as well as ease of repair if required.

**Capacity:** 3,240 lbs. (MPC)

**Range:** 200 nautical miles

**Team:** Up to 10 People

**Fuel Capacity:** 99 gallons (375 liters)

**Size: Length:** 31'-2" LOA

**Engines:** Twin outboards up to 400 HP

**Applications:** Patrol, rescue, transport, environmental monitoring

■ 30' x 9' Ember –V Hull Model: E930

# A Workboat You Can Rely on.

Putting our environment first by extracting and reusing HDPE pipe to make indestructible boats.

Workboats & especially rescue boats, simply can't afford to break down when the mission calls. They must be reliable and out of mind, allowing you to focus on the decision that matters. That is why our HDPE hulls remove any worry about impact damage, broken parts, and the sometimes catastrophic impacts that they bring.

With the E930, you get a mission-ready boat that will serve for decades to come.

## HDPE Cabin

IMCAB830 – 4'W x 6'L x 6'-6" tall control station with open back

## Cabin Raising/ Lowering

Option for cabin to be raised and lowered from the deck to 74" of clearance between the deck and the bottom of the cabin

## Gunnel Bow Winches

12V – 3,500 lb Electric Winch Console & Local Mounted Controls

## Aluminum Tow Post

4" SCH 80 Aluminum Tow Post

## HDPE Bow Door

48" HDPE Bow Door with manual crank control

## Fuel System

Stern Center Tank – 99 gal.

## Standard Electrical Kit – IMELE01

Navigational Lights – Bow (Port and Starboard) & Post All-Round Light – 12V  
Bilge Pump, Fuse Panel, Switch Panel – 12V, Battery (Starting & House- 12V),  
Battery Disconnect, Battery Cables

## Size Specifications

Length: 31' – 2" LOA Sides: 47"  
Beam: 9'  
Transom Height: 25" shaft

## Weight Specifications

Capacity: 3,240 lbs. (MPC)  
Hull Weight: 6,100 lbs.

## What color?

Color: HullBottom–Black,  
Deck/Surfaces – Marble White  
Custom Colors Available

## Material & Storage

Hull, floor and cabin material thickness is 3/4" HDPE. Transom and upper deck material is 3/4" HDPE.  
Standard with open deck to stern  
Gunnel storage compartments  
Transom width to receive single or dual outboard engines

# About Legacy HDPE

## Our Story

Legacy Innovations was founded in 2016 with a simple but powerful vision: reclaim abandoned HDPE water lines from oil and gas fields in the Powder River Basin and give them new purpose. We began by reselling recovered pipe for non potable water projects, a service we continue to provide today.

As operations grew, we transformed an arena into a plastic processing facility, allowing us to manufacture recycled HDPE sheets in house. Today, we produce durable HDPE tanks, utility beds, sheets, and boats built to last.

American Made is at the heart of what we do.

## Our commitment drives our everyday decisions

Legacy HDPE is set apart in countless ways from the standard in this field, including the totality of its removal process and the cost at which it performs such operations.

# Why HDPE Is Revolutionary ?

## The HDPE Advantage

HDPE is a superior alternative to traditional marine materials. Its unique properties make Legacy HDPE boats safer, longer-lasting, and environmentally responsible for demanding marine operations.

**Impact Resistant:** Withstands collisions and rough use without structural damage

**Corrosion-Free:** Immune to rust, rot, and UV degradation

**Impact Resistant:** Withstands collisions and rough use without structural damage

**Corrosion-Free:** Immune to rust, rot, and UV degradation

# Ready For Your Next Mission?

Discover a variety of other boat that can transform your operations with unmatched durability and performance.
